

March 9-10, 2019

WHAT IS MENLOHACKS?

MenloHacks is a student-run hackathon hosted at Menlo School in Atherton, CA, now in its fourth year. At the event, students will be able to devote 24 hours to developing their coding and tech skills through building a project that solves some identified issue in the world. Students will have the opportunity to learn about various new technologies, hone their programming skills, or even learn basic programming from scratch. By the end, every student will have a working demo of their project that is ready to be judged by leading figures in the technology industry. To this end, MenloHacks also works closely with M-Best, Menlo's women in STEM program.

OUR TRACK RECORD

MenloHacks III, which took place in March 2018, was a large step forward for MenloHacks. Over 190 hackers attended, representing a 50% increase from MenloHacks II, created 35 projects in total. At MenloHacks III, the winning team created a prototype device to provide early diagnosis of diseases based on a patient's vital signs. A winning hardware project at MenloHacks II used neural networks and image processing to create a [prototype keyboard](#) for people diagnosed with ALS. MenloHacks I included the winning [UberScheduler app](#), which allowed users to schedule Uber rides ahead of time, before Uber added this feature natively. Past judges have included Susan Wojcicki (CEO of YouTube), Dennis Woodside (COO of Dropbox), and Scott Forstall (Former SVP of iOS at Apple). A full video recap of last year's event can be found [here](#).

LOGISTICS?

MenloHacks will host approximately 200 students from various high schools (any high schooler is eligible to apply). The event will be held from 10AM on March 10th to 2PM on March 11th, 2018 at Menlo School, located at 50 Valparaiso Avenue, Atherton, CA, 94027.

WHY SPONSOR MENLOHACKS?

Sponsoring MenloHacks allows you to:

- **Connect with young computer scientists.** . Sponsoring MenloHacks IV will allow for the rare opportunity to make an early impression on upcoming software engineers. All students remember their first hackathon; the companies that are present will make a long-lasting impression.
- **Strengthen your brand.** Your company will be seen supporting the next generation of computer programmers. Attendees and observers alike will admire your commitment to the community and computer science education. Students will view your company as “hip” and therefore be more likely to view your company in the same domain as companies frequently featured in popular culture.
- **Distribute company swag (i.e paraphernalia).** Many students won't have very many T-shirts with company logos on them by nature of having not been to many hackathons and/or career fairs before. This means students are likely to view your company's swag as special and wear it more often. In addition, other items such as stickers are always very well received by attendees.
- **Evangelize your API.** At this stage in the student's programming career, they are unlikely to be familiar with all the various APIs on the market. By sponsoring MenloHacks students will know of your API first and therefore be more likely to be loyal to it throughout their programming career.

WHERE WILL YOUR MONEY GO?

Your money will help cover all the costs of the event, which receives no funding from the school. This includes food, beverages, background checks for chaperones, prizes, and hackathon swag.

SPONSORSHIP TIERS

Tier	Bronze	Silver	Gold	Platinum*
Cost	500	1000	2500	5000
Can Distribute Swag (i.e paraphernalia)	✓	✓	✓	✓
Thanked at Opening Ceremony	✓	✓	✓	✓
Thanked at Closing Ceremony	✓	✓	✓	✓
Logo on Website	✓	✓	✓	✓
Mentors	✓	✓	✓	✓
